GROOVE 21

design Artec Studio

Ariadne's thread

GROOVE is an innovative outdoor/indoor in-ground recessed system for direct view light—ideal for contour and path illumination in large urban areas, malls, and pedestrian zones.

Like the thread of Ariadne guides Teseo through the labyrinth to escape the Minotaur, the GROOVE lighting system points the way through architectural volumes. Given the distinctive light effect, this unique drive-over ground-recessed modular system allows designers and architects to vamp up unique ideas to be used in projects with all the necessary freedom.

GROOVE 21 builds in new and sophisticated technological processes: a double layer of transparent resin to guarantee IP rating and reliable performance even in extreme conditions, an additional layer of opal resin to guarantee uniform light.

Scan the QR-code for the latest information

Appliance installation ready for cascading connection.

The luminous flux emitted by each single length or geometry guarantees visual uniformity thanks to a correct lumen meter ratio.

Uniform light even near the joints for uninterrupted performance.

DMX 512 RDM

Trimless without frame.

Other installation and continuous line configuration versions available at www.light-performer.com

IP-67-rated double resin coating - transparent in the lower part to protect the LED from mechanical stresses and to guarantee maximum luminous efficiency - satin finish in the visible part, even in joints proximity, to ensure a homogeneous light distribution over the entire emitting area.

Anodised extruded aluminium profile for correct dissipation of the LED light source.

Stainless steel recessed box. Recessed box to be ordered separately.

Designed to last

Opal resin upper layer to increase mechanical strength and double internal application of transparent resin to protect the LED from mechanical stress.

Multiple control options Can be controlled with DALI and DMX RDM 512 protocols.

Designed for use in extreme

Able to withstand large variations in ambient

environmental conditions

100% light uniformity

Double layer resin to guarantee one hundred percent uniform light.

Quality light MacAdam ≤3 and CRI90.

Streamlined installation

Technical solutions designed for fast and safe installation. Sturdy stainless steel recessed casing with anti-deformation cover.

Constant light emission without voltage drops

Electronics designed to maintain constant luminosity for all the LED modules in the luminous configuration without voltage drops.

5 kN

Can withstand vehicle traffic above the standard

Suitable to withstand slow moving vehicles with air-inflated tyres.

Creative flexibility

GROOVE 21 allows designers and architects to develop unique ideas to be used in designs. Can be configured using www.light-performer.com

Cool Touch Safe to touch, maximum temperature 35°C.

Multiple installation solutions

Can be installed indoors or outdoors.

External power supply 48V has to be ordered separately. The RGBW and Tunable White (TW) versions should be powered at 48Vdc with SELV driver, available separately as accessories. Colour management is through DMX interface.

Can withstand vehicle and foot traffic for a vast range of applications. Static load up to 3000 Kg.

For outdoor applications, provide the appliance with drainage gravel for at least an additional 300 mm or an adequate drainage system.

Product supplied with external box for electrical connection in technopolymer suitable \emptyset 6 - 9 mm rubber cables. This is connected to the appliance with 25 centimetres of cable.

LIGHT-PERFORMER®

Light planning has never been so easy!

The Light-performer[®] configuration tool provides all the answers to your questions. Visit www.light-performer.com for quick and easy access to information and data, photometric files, prices and typical lighting configurations.

Light-performer[®] was awarded the iF Design Award 2018 in the Communication, Apps/ Software category: Here, you will find all the materials in our entire standard product portfolio. Light-performer[®] also allows you to individually configure even complex lighting systems in just a few minutes.

In a couple of clicks, you can export the photometric files to light planning software. No more onerous research or tedious waiting for prices: your project can be quickly and conveniently planned, thanks to Light-performer[®]!

Configured in 4 steps!

- 1. System design
- 2. Model
- 3. Lighting technology
- 4. Dimensions & accessories

GOOD REASONS FOR CHOOSING US

Decades of presence on the market. Design and production rooted in the values of Made in Italy and Made in Germany.

Clear conditions, real lumen indicate the luminous flux output of the luminaire

Pre and post sales technical support and lighting consultancy to meet assorted needs, even the most demanding calls for tenders.

Use of leading brands for electronic components.

Internal laboratories approved by third parties (CTF Stage 2 and WTDP). Ecodesign-EPREL compliance. Company with ISO 9001 quality management system.

Wide range of lighting solutions for the most varied applications, all from a single supplier.

<1%

Great performance over time with a defect rate of less than 1%.

The products with die-cast aluminium body with polyester powder finish after surface chemical conversion treatment in compliance with ISO 9227 and ISO 12944, are resistant to corrosion and suitable for C5 areas (ISO 9223).

BIM ready for projects with Dialux, Relux, Litestar software and Autodesk[®] Revit[®] Building Information Modeling (BIM) software.

Five-year warranty on the entire luminaire, extendable up to ten for special projects.

FUTURE PROOF

"Future-Proof" products with longer life LEDs and replaceable lighting systems for future upgrades. Exceptional longevity and savings with a real contribution to the circular economy.

The PRONTO program ensures availability and speed of shipment.

EcoVadis certification, bronze medal in recognition of the achievements in sustainability.
