

# FL ROUND+

# FL ROUND+

Versatile, functional and future-proof

Pioneering technology for modern light: the FL ROUND+ series from PERFORMANCE IN LIGHTING with an intelligent upgrade!

Thanks to the sustainable Future Proof technology, the luminaire series now has a replaceable light engine that can be changed as easily as a fluorescent lamp. This reduces maintenance costs, saves resources and meets the requirements of the EU Eco-Design Directive.

With its timeless design, super-flat height of just 14 mm and clear design language, the FL ROUND+ blends seamlessly into any architectural environment. As a versatile all-rounder, it can be installed flexibly as a wall, ceiling, pendant or semi-recessed luminaire. Practical installation solutions such as the Plug&Play plug-in connection or the tried-and-tested Twist-In system enable quick and intuitive installation.

Lighting technology, optics, power level and control can be individually adapted. With over 400 standard versions, no wishes remain unfulfilled. The Tunable White versions provide biologically effective light for offices, promoting the well-being and performance of employees.

For maximum design freedom, we manufacture tailor-made special solutions  
Made in Germany at our production and development site in Goslar.

# Quality in every detail

## Clear design language

Whether in offices, creative zones, corridors and foyers or private rooms - the functional LED surface light impresses with its elegant, timeless design and super-flat height of just 14 mm.

## FUTURE-PROOF

Replaceable light engine - easy to change like a fluorescent lamp, low maintenance, resource-saving, EU eco-design compliant.

## 100% uniform

Innovative sidelight technology and state-of-the-art lighting optics ensure maximum lighting comfort and high efficiency - in every area of application.

2.700

Kelvin

6.500

## Tunable white version

Individually adjustable illuminance level and light color for biologically effective light that increases well-being and productivity.

# Versatile, efficient, functional and future-proof

## + Variety

With its wide range of variants, sizes and light optics, the FL ROUND+ series enables a uniform lighting concept for the entire building. At the same time, it allows maximum design freedom room by room.

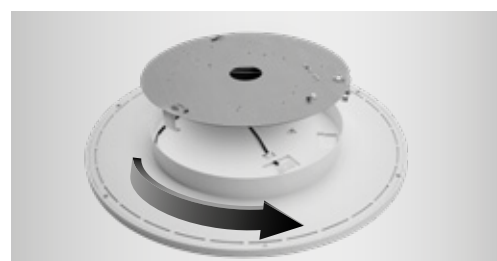

## + EN 12464-1

In the version with microprismatic cover, the luminaire ensures glare minimization and high uniformity. This makes it ideal for VDU workstations in accordance with DIN 12464-1 and UGR <19.

## + Easy assembly

The entire luminaire family can be installed quickly and intuitively thanks to practical installation solutions such as the Plug&Play plug-in connection of the supply cable or the Twist-In system.

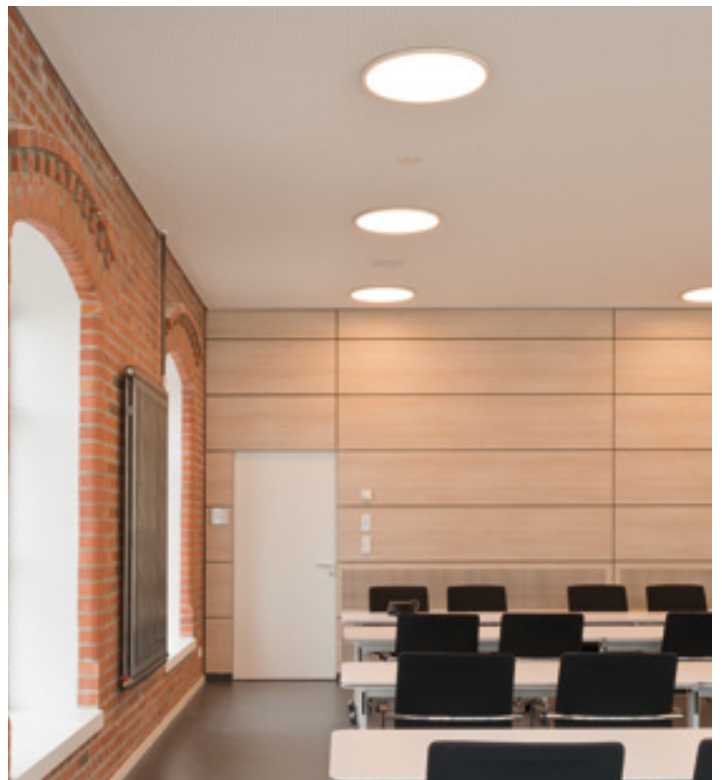

## + Optional

Whether emergency lighting for central battery or rechargeable battery operation, Human Centric Lighting or CASAMBI module - our wide range of accessories allows you to create customized lighting solutions.

# The perfect solution for every requirement

# Maximum design freedom for individual lighting concepts

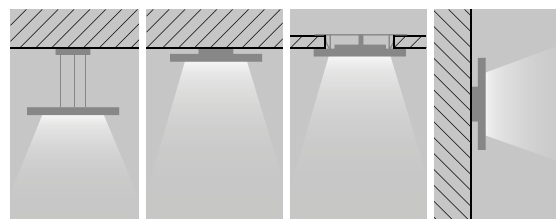

## + Diameter

The FL ROUND+ is available in 3 sizes: 333 / 555 / 777 mm diameter. If the sizes are combined, the luminaires appear equally bright thanks to different luminous flux packages.

## + Mounting options

The luminaire blends perfectly into its architectural surroundings. It can be installed as a wall, ceiling, pendant or semi-recessed luminaire.

## + Light optics

The microprism version is suitable for glare-free illumination of computer workstations, the opal cover ensures uniform, homogeneous light distribution.

## + Color options

The frame is available in the standard colors black, white and grey. Special solutions in 2700 RAL colors are also possible on request.

## + Switching options

ON/OFF, DALI, Tunable White or switchable power levels: The product family offers the optimum control technology for every requirement.

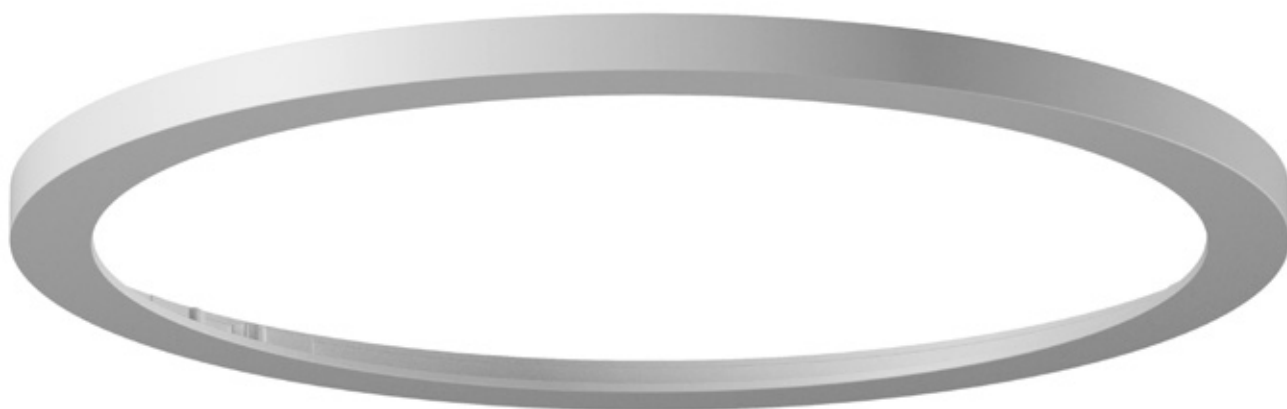

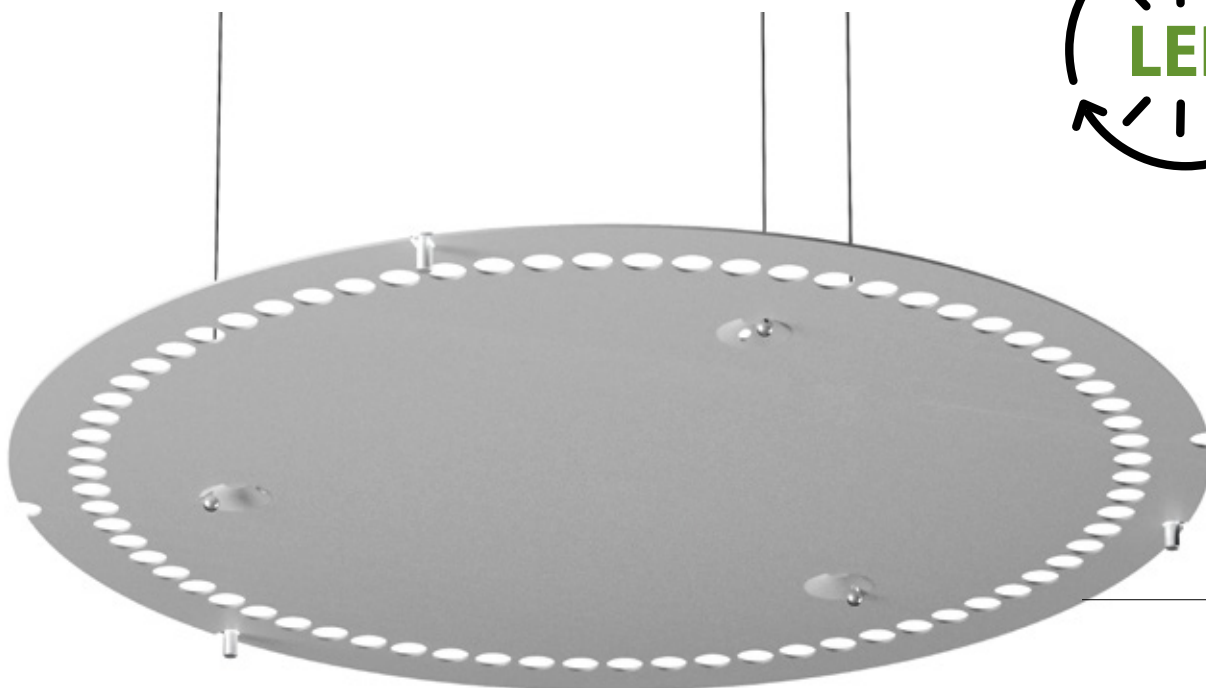

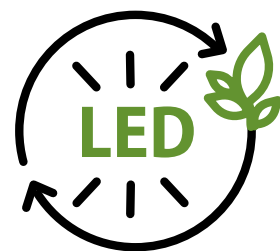

## + Light effect

The range includes variants for direct or direct/indirect lighting (Corona for discreet ceiling illumination).

# FUTURE-PROOF

## Sustainable light, easy to change

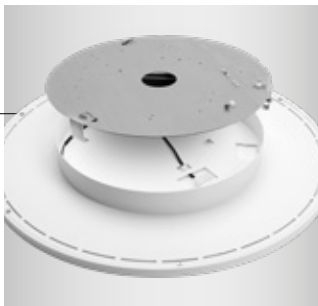

Since 2017, PERFORMANCE IN LIGHTING has only been developing products with replaceable light engines or system components in which the LED module, optics and converter can be changed at a later date. Up to 98% of the materials can then be recycled or reused. For us, sustainability is not a trend, but a principle - from the initial idea through to production.

The light engine can be replaced effortlessly, just like a conventional fluorescent lamp. This not only saves time, but also enables you to use your lighting system responsibly. With one-off planning costs, you can enjoy consistently high luminous intensity, secure your future and at the same time comply with the EU Eco-Design Directive VO EU 2019/2020. True to our motto "A light that lasts".

**Long-term security:** our guarantee for future replacement options gives you long-term flexibility and maximum security. This means you can always adapt your lighting to new requirements without having to replace the entire installation.

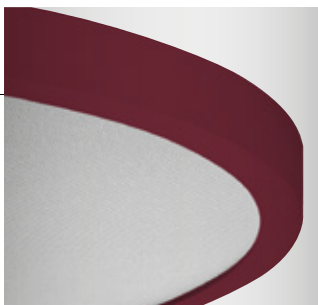

**Simple, convenient and time-saving:**

Installation flush with the ceiling or wall thanks to innovative technology incl. safety cable, Plug and Play plug-in connection of the supply line and the Twist-In system in no time at all.

**Easy to refurbish and maintain:**

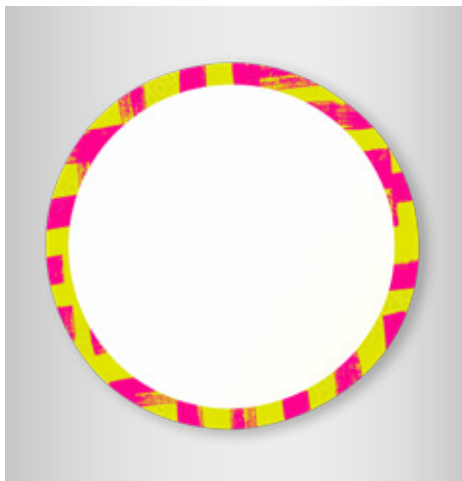

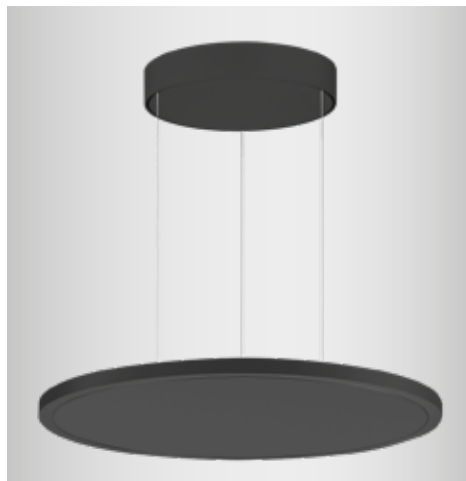

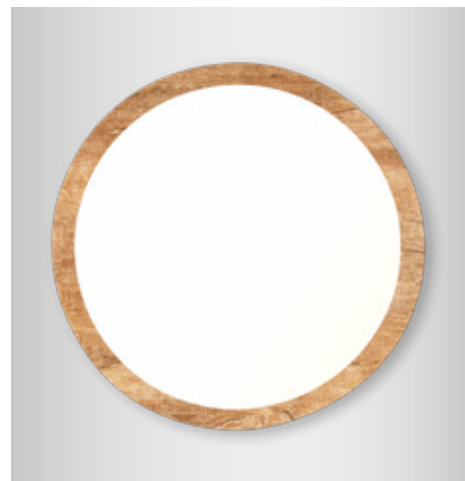

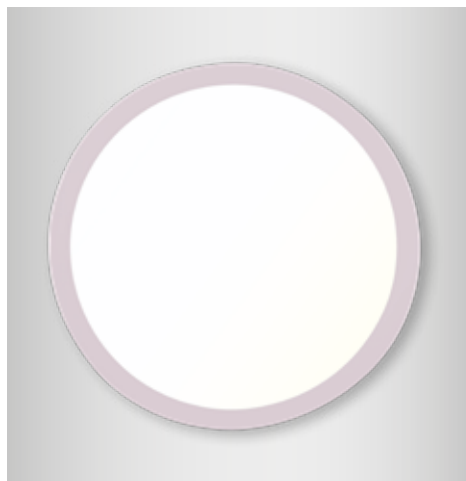

With its replaceable light engine, the FL ROUND+ is a future-proof solution. Thanks to the sophisticated technology, replacement is as easy as it used to be with fluorescent lamps. The converters can also be easily replaced at a later date.

**Individual and high quality:**

The housing, made of robust die-cast aluminum and sheet steel, is finished with a high-quality, impact-resistant and scratch-resistant powder coating. Choose from over 2700 RAL colors and customize the housing with a glossy or textured surface.

# Customized solutions “Made in Goslar”

PERFORMANCE IN LIGHTING is the specialist for customized lighting solutions.

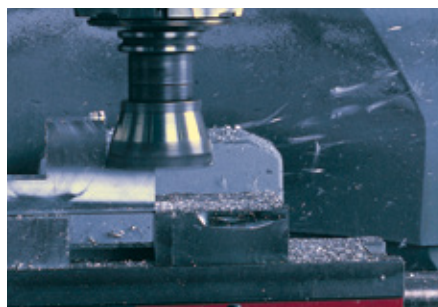

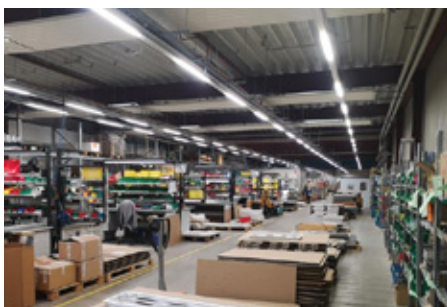

We combine a high level of planning expertise with maximum flexibility in production and are therefore one hundred percent “project-oriented”.

Our high level of vertical integration enables us to design and develop elaborate individual pieces that meet the highest safety standards thanks to our VDE-certified laboratories. From playful accessories to modern control technology, everything is possible.

Describe your design and lighting requirements to us - we will make them a reality!

Quality Made in Germany: Our products and special solutions, produced on site, stand for safety, quality and durability plus energy efficiency.

# LIGHT-PERFORMER®

## The perfect tool for customized lighting projects

Design your lighting projects in no time at all with our innovative configuration tool. You can configure even complex lighting systems in just a few minutes. The intuitive operation makes project planning child's play, while all the important data is available to you centrally in one place. You can also choose from our entire product range to make your projects even more flexible. With just one click, you can create precise parts lists, data sheets, lighting and CAD files and get started with your planning straight away.

Save an infinite number of projects and adapt them flexibly at any time. Thanks to its multilingual capability, the tool can be used worldwide and was awarded the iF Design Award for innovation and user-friendliness in 2018.

- ⊕ Web-based configuration tool for customized project solutions
- ⊕ Quick and easy configuration of complex lighting systems in minutes
- ⊕ Intuitive handling makes project planning child's play
- ⊕ Centralized data provision: All relevant information in one place promotes efficient project planning and quick decisions
- ⊕ Parts lists, project and system data sheets, assembly aids, lighting and CAD files, prices and tender texts at the touch of a button, download or print
- ⊕ Download lighting data for configurations and standard products at the touch of a button and start directly with the lighting planning (ULD, ROLF and Revit files)
- ⊕ Save unlimited projects and customize them at any time
- ⊕ Live chat: direct support for quick solutions
- ⊕ Globally usable thanks to multilingual support
- ⊕ Clever feature: Amortization calculator and service life and lighting calculator for optimum cost-effectiveness of your project
- ⊕ Awarded for innovation and user-friendliness (iF Design Award 2018)

# Advantages at a glance

- + Versatile luminaire family for every application
- + FUTURE-PROOF - Light engine and system components interchangeable
- + Maximum values for efficiency and service life for the allocation of subsidies and building certification
- + Maintenance-friendly design (complies with the EU Eco-Design Directive 2019/2020)
- + Attractive, slim design with only 14 mm visible height
- + Microprism version for glare-free illumination of computer workstations, opal cover for uniform general lighting
- + Through-wiring Ready
- + Twist-In system, safety cable, plug and play connection of the supply cable for quick installation and easy maintenance)
- + Tunable white version with adjustable illuminance level and light color (2700-6500 K)
- + Emergency lighting function with integrated rechargeable battery or central battery possible
- + Designed, developed and assembled in Germany
- + Customized solutions for every requirement
- + Available in all RAL colors
- + 5-year warranty

## PERFORMANCE iN LIGHTING powered by GEWISS

Italian design expertise meets technical innovation and quality made in Germany. Whether individual spotlights or holistic lighting concepts - when it comes to light, we have the solution.

With over 30 years of experience, we are your partner for professional lighting applications in the commercial project business.

We inspire our customers with sophisticated indoor and outdoor luminaires, powerful spotlights and floodlights, effective façade lighting, innovative pole and bollard luminaires and effective, standard-compliant office lighting.

As a specialist in office lighting, PERFORMANCE iN LIGHTING develops office luminaires with sustainable design and future-proof technologies.

We combine a high level of planning expertise with maximum flexibility in production and are therefore one hundred percent “project-oriented”.
